For EPA Team Discussion Only- May Contain PII

Hi Team,

Attached is DRAFT Residential building and Lot# Layout for Classics sample locations PRVY-Controlled/Privacy
When reporting results I'll be replacing the sample location ID with the building letter followed by lot# to keep consistent with how we are referencing the other locations and to remove the address #. I made up the building number. They are grouped in pairs because they appear to be duplexes.

PRVY-Controlled/Privacy

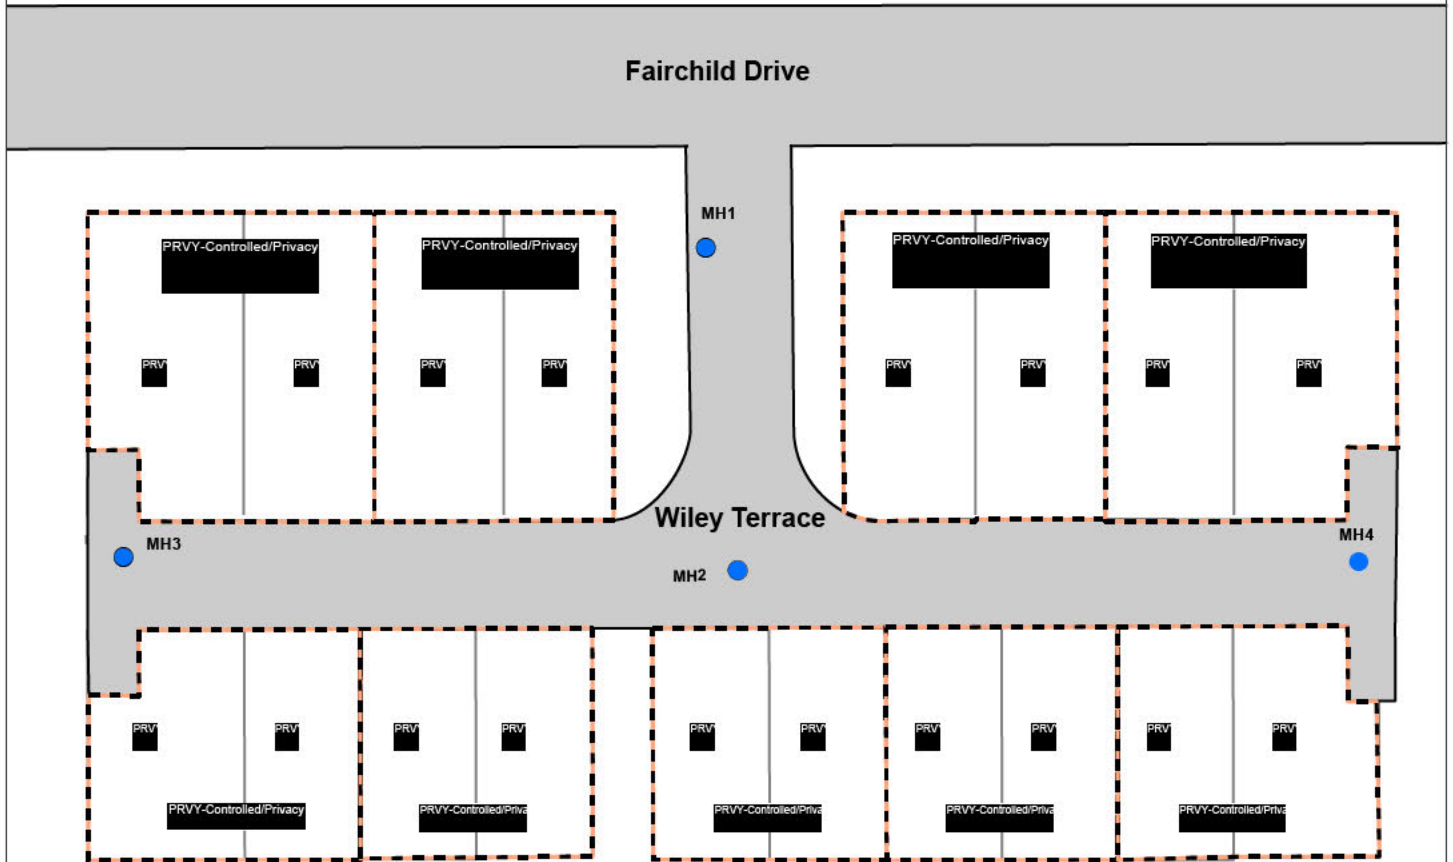

I intentionally skipped building "I"

Please let me know if you have any questions.

Thanks!

Alana
